ENGLISH

The instruction manual for this device consists of general and specific instructions, both must be carefully read and understood before use. **Attention!** This leaflet shows the specific instruction only.

SPECIFIC INSTRUCTIONS QUICK STEP-A/S

This note contains the necessary information for a correct use of the following product/s: rope clamps for right/left foot Quick Step-A/S.

1 FIELD OF APPLICATION

Attention! Not to a PPE.

The rope clamps for foot Quick Step-A/S are not personal protection equipment (P.P.E.). They are only accessories to facilitate rope ascents and they must not be used to prevent falling from a height. They keep the rope stretched under the body of the user, thus facilitating the flow of the other blocking devices and helping to keep the body of the user vertical.

1.1 - **Quick Step-A model** (Fig. 2.2). This version comes with a lever that keeps the device open to facilitate insertion of the rope and prevent it from coming out. Ideal for tree climbing and work at a height.

1.2 - **Quick Step-S model** (Fig. 2.1). This version does not come with an opening lever, so the rope can be inserted with a single hand and released rapidly by a

simple leg movement.

2) **NOMENCLATURE** (Fig. 2). A) Release lever. B) Bottom buckle. C) Adjusting webbing. D) Locking cam. E) Body. F) Protection webbing. G) Opening/safety lever.

2.1 - **Main materials**. Refer to the legend in the general instructions (paragraph 2.4): 2 (locking cam); 3 (body); 7 (protection webbing); 10 (adjusting webbing).

3) **MARKING**.

Numbers/letters without caption: refer to the legend in the general instructions (paragraph 5).

3.1 - **General** (Fig. 3). Indications: 4; 7; 8; 19; 30) Maximum load permitted; 31) Permitted rope diameters; 32) For left (L) or right (R) foot.

3.2 - **Traceability** (Fig. 3). Indications: T1; T3; T8.

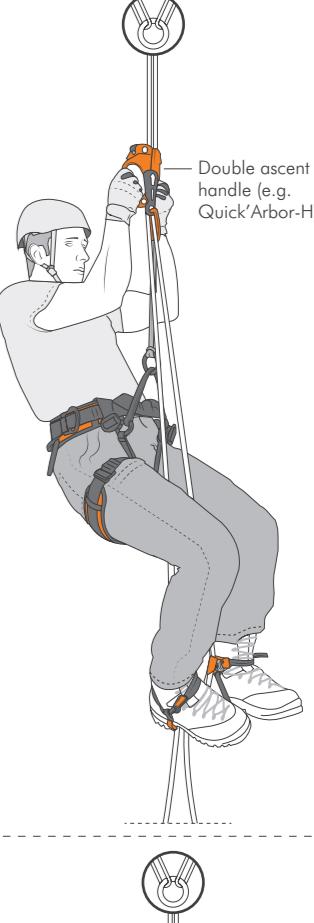

4) **COMPATIBILITY**.

The device can be only used with ropes (core + sheath) static or semi-static (EN 1891) or dynamic (EN 892) Ø 8-13 mm. **Attention!** Do not use on metal cables or piled ropes.

5) **CHECKS**.

Further to the checks listed below, comply with what indicated in the general instructions (paragraph 3). Before each use, verify that: the cam teeth are present and show no signs of wear. During each use: check regularly the buckles and the adjustment devices.

8 QUICK STEP-A - TREE CLIMBING PROGRESSION

Double ascent handle (e.g. Quick Arbor-H)

8.1

Quick Step-A
For right foot.

Quick Step-A
For left foot.
